1.0 INTRODUCTION

1.1 Purpose

This document identifies the system part number for approved systems supported by the EGPWS Database¹ production process and covered by the FAA Type 2 Letter of Acceptance (LOA) issued to Honeywell for their processing of terrain, obstacle, runway, and magnetic variation data.

1.2 Scope

This document provides an identification of EGPWS Database part numbers produced by the EGPWS Database production process, the data quality requirements associated with each database part number, and the system part numbers for those systems that use these databases and are covered by Honeywell's Terrain, Obstacle, Runway, and Magnetic Variation Type 2 LOA.

1.3 Used On

Section 5.0 provides the complete information for the end-use equipment (i.e., system part number) and the database part numbers used by the equipment, for those systems covered by Honeywell's Terrain, Obstacle, Runway, and Magnetic Variation Type 2 LOA.

¹ The term EGPWS Database is used as a general term to refer to any database product produced in support of the products identified in section 1.3, and implicitly includes multiple data types, including terrain, obstacle, runway, and/or magnetic variation data types.

2.0 REFERENCED DOCUMENTS

2.1 Company Internal Documents

Table 2-1 contains Honeywell documents that are referenced in this document:

Reference Number	Document Number	Title

Table 2-1 Honeywell Documentation

3.0 ACRONYMS AND ABBREVIATIONS

Table 3-1 contains the acronyms and their definitions that are used in this document:

Acronym	Definition
AESS	Aircraft Environment Surveillance System
AFR	Africa
AGM	Advanced Graphics Module
ARINC	Aeronautical Radio, Incorporated
ASI	Asia
AW	AgustaWestland
CAN	Canada
COMAC	Commercial Aircraft Corporation of China, Ltd.
DU	Display Unit
EEU	Eastern Europe
EGPWF	Enhanced Ground Proximity Warning Function
EGPWM	Enhanced Ground Proximity Warning Module
EGPWS	Enhanced Ground Proximity Warning System
EUR	Europe
FAA	Federal Aviation Administration
KSD	King Smart Display
LOA	Letter of Acceptance
LRU	Line Replaceable Unit
MES	Middle East
MK	Mark
NAM	North America
NGR	Next Generation Radar
PAC	Pacific
PDM	Product Data Management
RTCA	Radio Technical Commission for Aeronautics
RDR	Radar
SAF	South Africa
SAM	South America
SPA	South Pacific
USB	Universal Serial Bus

Table 3-1 Acronym List

4.0 DATABASE PART NUMBERS

The following table provides the listing of applicable databases and their associated data quality requirements.

Database Part Number	Database Description	Data Quality Requirements
996-0109-xxx	MK V / MK VII EGPWS Database	DBS69002400-000 995-0109-000
DO69001801-0xxx	MK V-A EGPWS Database (USB Format)	DBS69001801-000

Table 4-1 Database Part Numbers

Note 1: Deliverable part number DO69006860-0xxx contains EGPWF Database Worldwide (DO69002412-0xxx) to uniquely identify the deliverable for F6X. This deliverable also contains the Digital Signature File “crate.dsf” file v3.1 (reference 2.1.7).

Note 2: Deliverable part number DO69006861-0xxx contains Terrain Server Database Worldwide (996-0146-xxx) to uniquely identify the deliverable for F6X. This deliverable also contains the Digital Signature File “crate.dsf” file v3.1 (reference 2.1.7).

Note 3: COLzz-0005-1xxx database part number is used for ISS-2100 Equipment installed on Boeing Aircraft and COLzz-0005-2xxx database part number is used for ISS-2100 Equipment installed on COMAC Aircraft.

5.0 LOA APPLICABILITY

The FAA process for issuing a Type 2 LOA requires the applicant to demonstrate that their aeronautical data process is capable of producing databases which are compatible with the data quality requirements identified within the airworthiness approval process.

The following sections provide listings for all of the configurations for which database compatibility with the data quality requirements defined as part of the airworthiness approval process has been demonstrated. These configurations are eligible for FAA issued Type 2 LOA.

The LOA applicability described in this document has considered the compatibility of the databases and the system they are loaded into. Before loading a database into one of these configurations please ensure that all applicable Service Bulletins & Service Information Letters are considered.
