DATABASE SERVICES BULLETIN

1. Applicability

This bulletin is applicable to operators of the following aircraft with Honeywell HW/SW Flight Management Systems:

- FMZ-2000/FMZ-2010/NZ2000/NZ2010/PRIMUS
- Apex/PRIMUS EPIC FMS
- Agusta Westland AW139
- Cessna Sovereign
- Dassault PRIMUS EPIC F900, PRIMUS EPIC F2000, and F7X
- Embraer 170/190, 175/195
- Gulfstream G350/450, G500/550, and G650
- Hawker 4000
- Pilatus PC-12NG
- Viking DHC6-400

2. Purpose

Because of removed procedures from the Honeywell navigation database as required to mitigate FMS anomalies that may occur with certain terminal area procedures (Refer to Honeywell Service Information Letter, Publication Number D201011000003) it is important that the operator use the correct database for a specific aircraft configuration.

The purpose of this Database Services Bulletin is to replace Service Information Letter D201108000053, to provide a configuration table for the operator to understand which database is appropriate for a specific aircraft configuration.

This will also assist the operator in determining what data was removed because of the above-mentioned Service Information Letter D201011000003.

3. References

To find, see, and download Honeywell Technical Publications, go to www.myaerospace.com.

4. Summary

- a. Tables 2 through 15 are cross-references between the aircraft configuration and the applicable FMS database identifier.
- b. For Tables 2 through 11, the top-level system part number can be obtained from the system configuration page.
- c. Locating procedure removal information:
 - i. To locate the affected procedures for the PRIMUS EPIC Standard databases on the Aero Navigation Database website (ads.honeywell.com), refer to the Flight Info link under Data NavDB and then the Content/Procedures.
 - ii. For PRIMUS EPIC and Apex Integrated Navigational Data Services (INDS) subscriptions on the INDS web site (www.epicinds.com), refer to the Flight Info tab at the top of the screen and choose the Content/Procedures link.
