

Fast Start to Updating your GPS Database

1. First, refer to the document “Is Internet Download Right for you?” to determine which updating method (mail or internet) will work best for you. This is given the currency of your GPS software, computer compatibility, and personal comfort level with the internet.
2. Second, if you have decided to go with Internet Download, you will want to familiarize yourself with the three steps required to complete the update.
 - Step 1: Download and install the Windows version, GPS Database Loader program. Detailed instructions can be found under Related Documents: “Installing GPS Database Downloader Instructions”.
 - Step 2: Download the Internet database file using the appropriate Database Key. Detailed instructions can be found under Related Documents: “GPS Download Instructions”.
 - Step 3: Upload the database file from your computer to the GPS unit using the installed windows GPS Database Loader (see Step 1). Detailed instructions can be found online under Related Documents: “Upload GPS Database Loading Instructions”
3. In the event that you run into a problem that is not covered in the instructions, please refer to the “Troubleshooting” document found under Related Documents.
