FLIGHT GUIDE® Provides The Support Information You Need On The Ground

As an AV80R member, you can now add on **Flight Guide** Fuel Pricing & Airport Services Data to your handheld GPS. **Flight Guide** helps eliminate the uncertainty involved in arriving at an unfamiliar airport, by giving you the support information you need on the ground. Businesses on field can be easily accessed by touching the “Services” button. FBO names, attendance, services, frequencies and contact information are all provided. Other on field services, such as restaurants, hotels and car rentals are also listed for your convenience, along with their contact information. Now you can plan your flights based on what airport has the on field services you desire.

Looking for the best price for fuel? Problem solved. **Flight Guide** provides this valuable information via the “Fuel Pricing” button. This details businesses that offer fuel including, brand, fuel type, service and price. The “Search Price” button displays a nearby fuel price comparison of fuel prices within 100 miles, noting the bearing from your designated airport. Now you have the ability to change your route based on which airports have the best fuel prices.

Flight Guide also lists pertinent off field services, such as nearby restaurants, hotels, transportation and recreational information, via the “Local” button. Special activities and contact information are provided including, distance from the airport, free pickup service & pilot discounts. **Flight Guide** makes it easy for you to save money!
