DATE: *18 August 2023*
SUBJECT: *LSBM Upgrade to 6.4 / Ziegler PKI*
Impacted: *Some Airbus Air Transport Customers*
Cycles: *2309 NavDB and 636 Terrain Release and subsequent*

Dear Valued Customer,

Airbus has directed Honeywell to upgrade our LSBM software to version 6.4. This upgrade uses Airbus Issuing CA Ziegler G1 signed files and is not compatible with LSBM versions prior to 6.3. Therefore, if your data loader does not accept the Ziegler signed databases, you will need to perform the PKI signing when you receive the databases from Honeywell.

Once you upgrade your data loader to read the Ziegler certificate, you will not need to do your own signing any longer.

For further instructions or help, please contact Airbus Customer Services.

Thank you,

Aviation Services
