

## **GoDirect Global Mobile Data**

Cost-Effective Cabin Connectivity When You Need It

GoDirect is Honeywell's industry-leading portfolio of services and applications that provide business aviation operators, flight crews and maintenance teams with the information they need to control their services and network. GoDirect Global Mobile Data provides business jet passengers data connectivity between the aircraft and ground using reliable cellular coverage, anywhere in the world.

### The Most Flexible Solution Yet

Honeywell has the most flexible solution yet for cabin communications. It gives you the tools you need to provide the exact level of service passengers want, balancing the need for speed against the most affordable options. Whether you need to connect a single device or a dozen, provide basic internet connections or stream live video – GoDirect Routing Software makes it easy to manage your requirements anywhere, anytime.

### Providing the Best of Both Worlds, Worldwide

Business jet passengers want the ability to connect to the internet wherever and whenever they travel. It doesn't much matter to them how those connections are made, as long as they're fast and reliable. With the GoDirect Global Mobile Data service, Honeywell provides operators the best of both worlds – satellite communications and mobile data cellular – and offers the ability to switch from one type of service to another in a way that's transparent to cabin passengers.

### GoDirect Global Mobile Data

The GoDirect Global Mobile Data service uses AT&T Wireless to provide business jet passengers with the best-available connectivity and the kind of global coverage that only AT&T can provide through its vast network in the US and roaming partners. The service augments the aircraft's satellite communications capabilities to provide full connectivity when satellite communication signals aren't available – in the air, on the tarmac or in the hangar.

We can also help you manage your communications costs by automatically switching to less-expensive cellular service when both SATCOM and cellular signals are detected. It's all done automatically thanks to Honeywell's full connectivity solution, which includes hardware, software and airtime services. Through our partnership with AT&T Wireless, only Honeywell can offer a completely integrated solution with a full complement of tools and value-added services to let you make the most of your cabin communications capabilities.

### Benefits:

- Provides data coverage using cost effective cellular networks when on the ground or satellite communications aren't available
- Uses the highly reliable AT&T Wireless 3G and 4G networks and its global roaming partners to connect more networks across the globe
- Intelligent router selection to use the best link: Seamlessly manages and integrates satellite and cellular data communications at the router\*
- Transmit large amounts of data on GSM based 3G and 4G (LTE)\* cost effectively

*\*Requires compatible aircraft router*

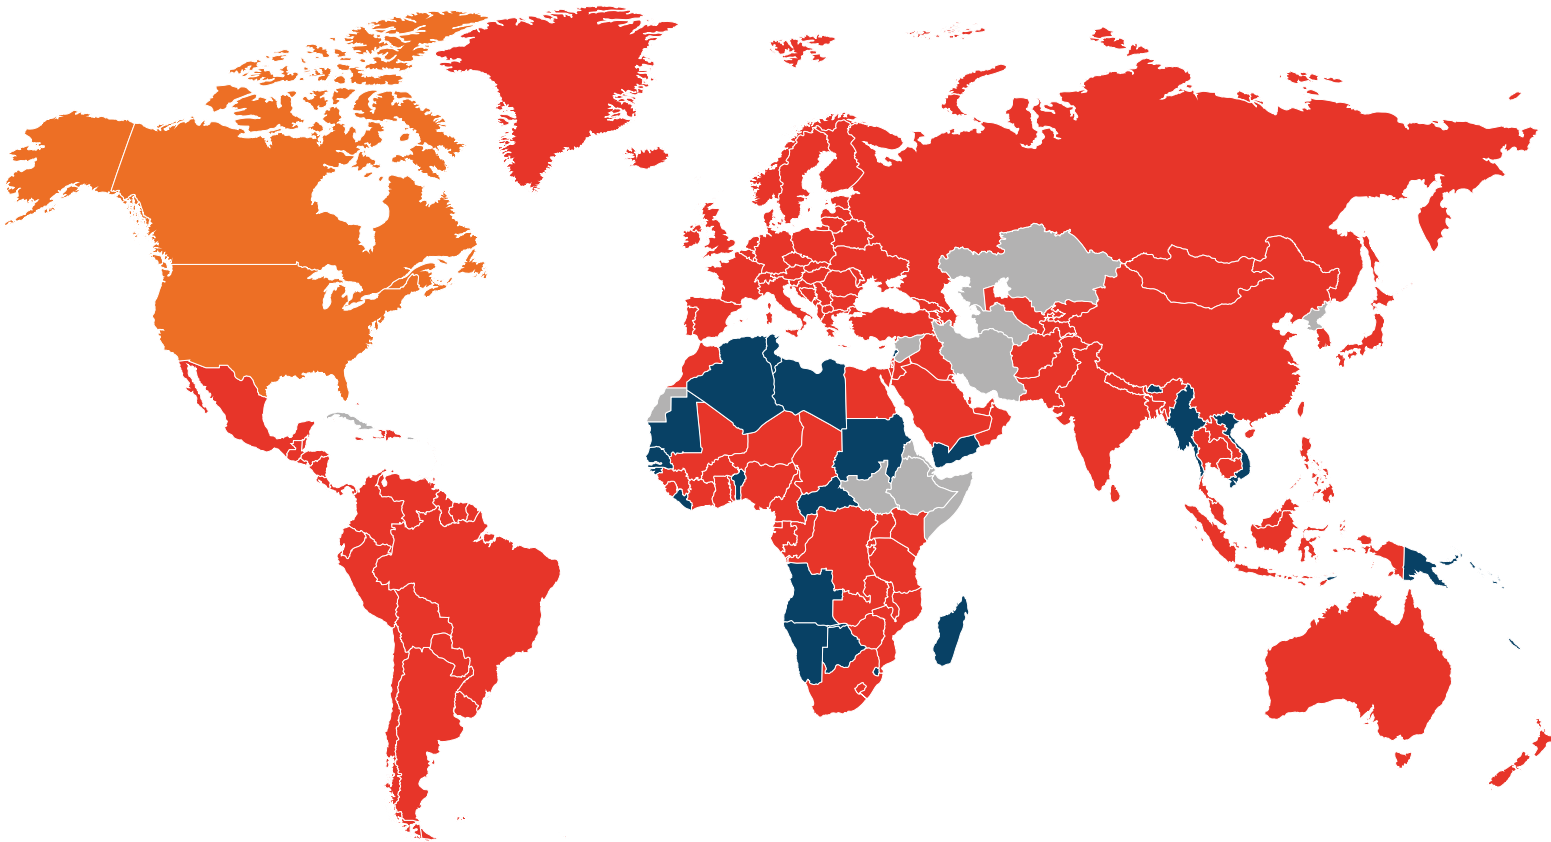

### Zones and Subscription Plans

#### GLOBAL MOBILE DATA (3G/4G) PLANS & PACKAGES

PLAN	MONTHLY DATA ALLOWANCE	COVERAGE FOR DATA ALLOWANCE	INTERNATIONAL ROAMING
NA1	1 GB	Zone NA (US/Canada)	Zone A + Zone B
NA2	2 GB	Zone NA (US/Canada)	Zone A + Zone B
NA5	5 GB	Zone NA (US/Canada)	Zone A + Zone B
WORLD 1	1 GB Worldwide	Zone NA+Zone A:	Zone B
WORLD 2	2 GB Worldwide	Zone NA+Zone A	Zone B
WORLD 5	5 GB Worldwide	Zone NA+Zone A	Zone B

All Plans allow overage and global roaming
