

GNS Database Download Instructions

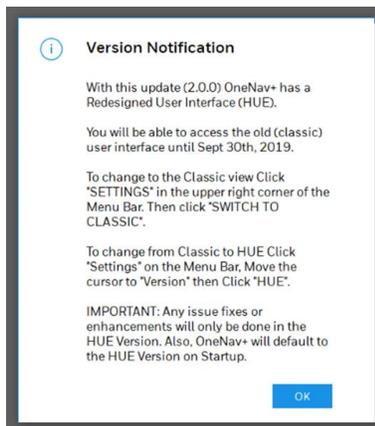

Access the following URL link or scan the QR code for a video demonstration of the below instructions.

Win 7 install http://y2u.be/L4YvZ1jYwG8		Win 8 install http://y2u.be/EFma5HU1X28	
---	---	---	---

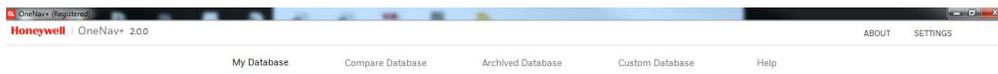

Step 1: Double click on the OneNav+ icon on your desktop

Step 2: Read any alerts that pop up for important information then click OK.

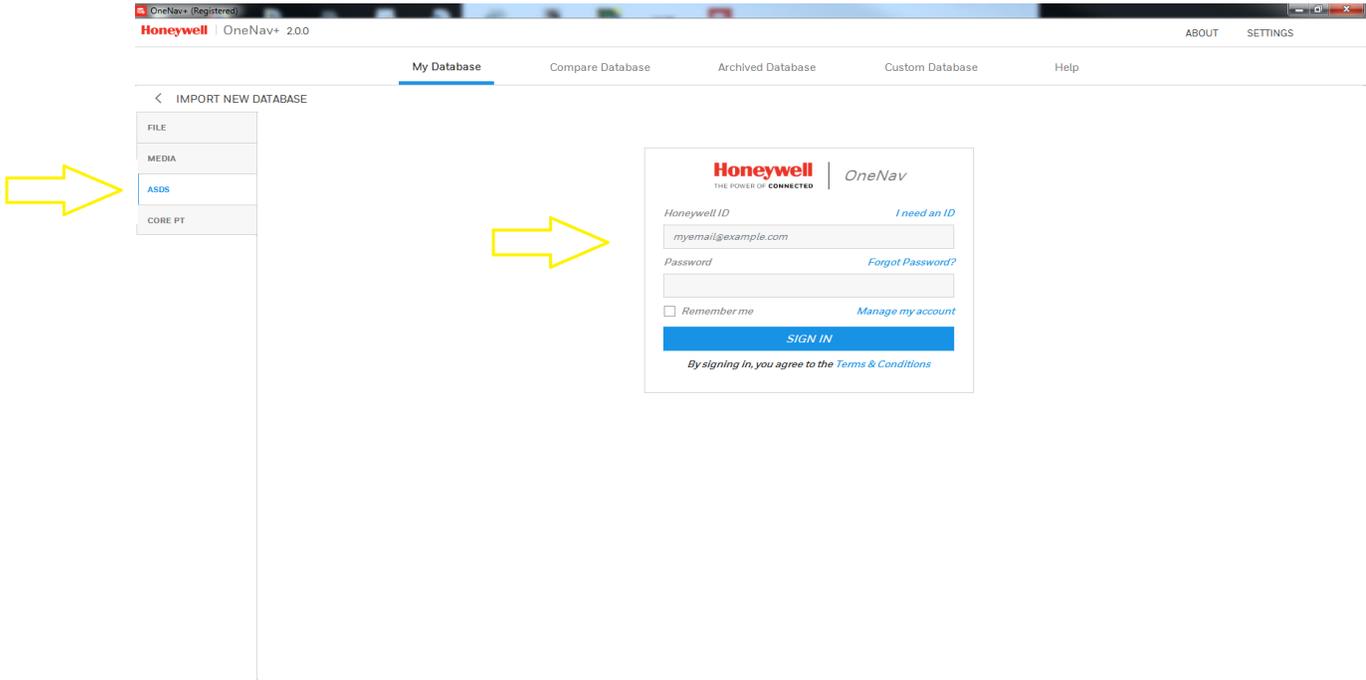

Step 3: Select Import or Import New Database

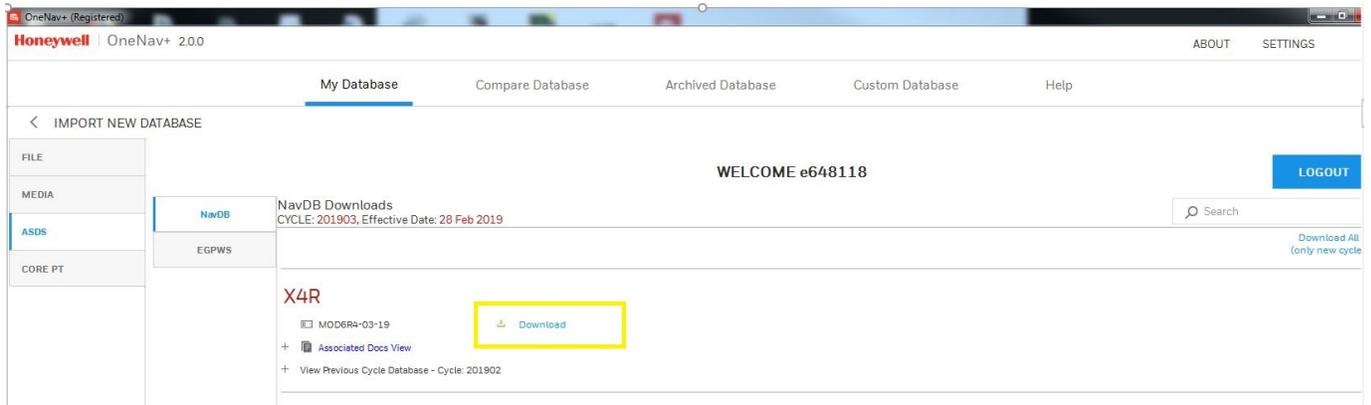

Step 5: Select ASDS Tab on left side of screen

Step 6: Enter your Honeywell USER ID and Password

Step 7: Accept the license agreement

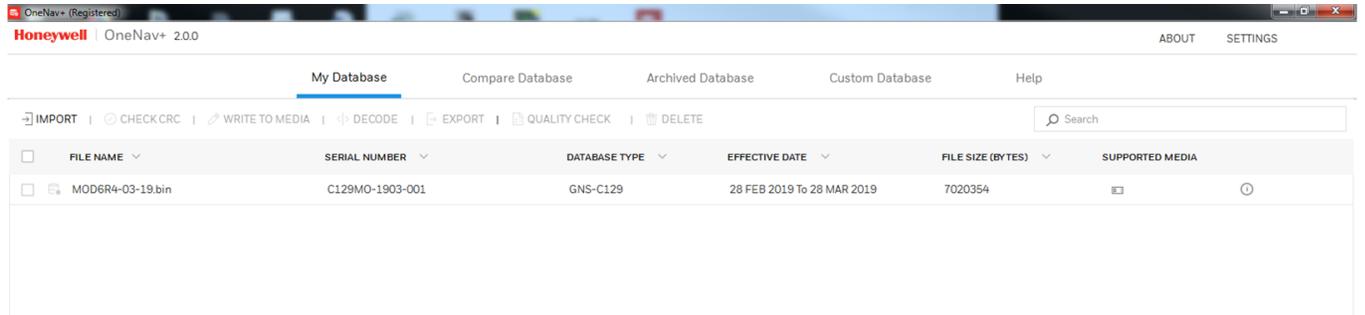

Step 8: Click on download button. **FYI –Your database ident will always be on the left side of the screen (in the example below it is X4R). Please note this ident for your records in case you need Technical assistance in the future.

Always review the content letter to see if there have been any database changes this cycle. Content letters are available at ads.honeywell.com once you login, click on My Downloads. Click on View next to Associated Docs and then Content link. **Future OneNav+ version will have content letters available in program.**

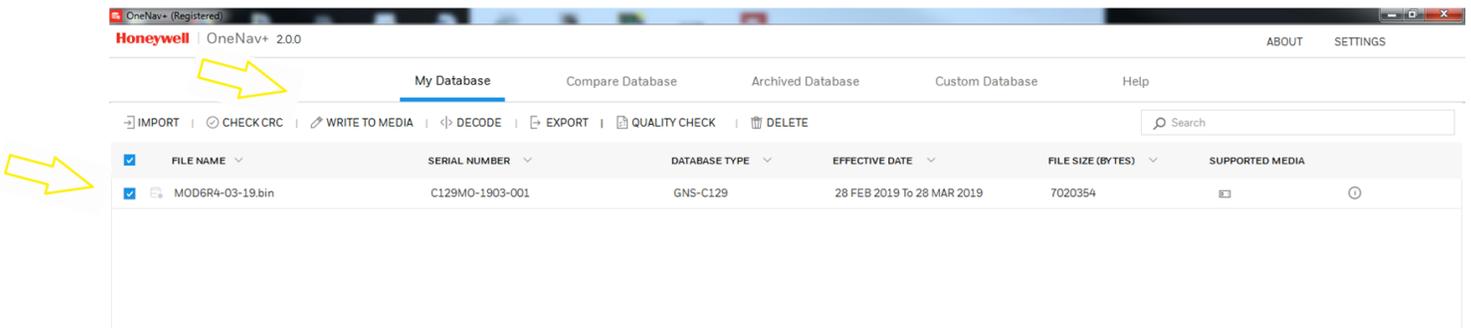

Step 9: The file will start to download

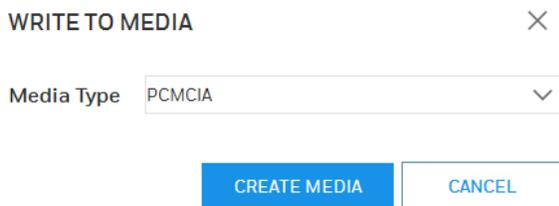

Step 10: Once finished, you will see your database. Place the PCMCIA card (arrows up and in) into the OMNI Drive and make sure the OMNI Drive is plugged into the computer.

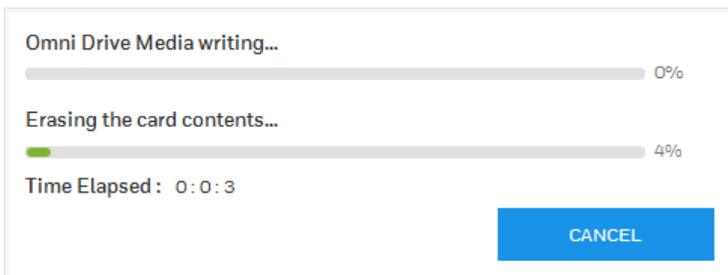

Step 11: Select the box to the left of the file name then click on the WRITE TO MEDIA button

Step 12: Select PCMCIA then click on the CREATE MEDIA button

Step 13: The card will start to erase and then write to the card.

Step 14: You are now finished. Eject the card and shut down all programs.

TROUBLESHOOTING

If you are receiving an error when you try to download your database, please see below for possible reasons.

*You must have admin rights on your computer - contact your IT department if you are unsure

*Your antivirus program could be preventing the program from downloading properly. Try to turn it off for a very brief time so you can download your programs. Always remember to turn it back on once finished.

* Was the OMNI Drive plugged in when you ran the OMNI Drivers setup? If not, please uninstall the OMNI Drive program and reinstall with the OMNI Drive plugged in.

*Try restarting your computer and try again

*Try a different USB Port

*Always say 'No' or ignore if the computer asks to format the PCMCIA card.

If you are still experiencing issues after trying all above items, please email us at: dsa@honeywell.com
