INDS Data Manager (IDM) 4.6.0 Windows and iOS Release

Date: December 19, 2022

Subject: Release of IDM 4.6.0 Windows and iOS Application December 19, 2022

Delivery: IDM 4.6.0 WIN: INDS Website; **IDM 4.6.0 iOS:** AppStore

AIRAC Cycle: Navigation Database Cycle 2212, Charts Cycle 2225, and Subsequent

Dear Valued Customer,

We are pleased to announce the release of the IDM 4.6.0 Windows and iOS Application version on December 19, 2022. It will be available for use at 08:30 A.M. Phoenix Time USA (15:30 UTC).

Migration to the newest version of the IDM application streamlines support and improves customer experience. We recommend upgrading to the latest version of the application.

This new version of the application (IDM 4.6.0) includes the following:

| IDM 4.6.0 WIN | | IDM 4.6.0 iOS | |
|--|---|---|--|
| Improvements | Limitations | Improvements | Limitations |
| Display of Jeppesen Alerts in the Notification section of the Downloads page | When Write to CD is performed using Taiyo Yuden CD-R, the CMC Remote Terminal (CMC-RT) tool does not list the file to load | Display of Jeppesen Alerts in the Notification section of the Downloads page | During database load operation, if IDM is closed and started again, the sequence of files displayed in the Uploads section varies to that of the sequence displayed prior to closing the application |
| | After successfully writing databases to DVD, load status remains stuck at 100% when load operation is performed using the CMC-RT tool | In-app alert on availability of new application version when earlier version of application is started or in use | |
| | Show password icon in the Password field is not functional and does not show the password when respective icon is clicked | Reduced time to display Select Coverage & Edit Coverage links in the Downloads page during Offline login | |
| | | Save option in Subset window during Offline login displays message requiring internet connectivity to save the changes | |

| IDM 4.6.0 WIN | | IDM 4.6.0 iOS | |
|---------------|-------------|---|-------------|
| Improvements | Limitations | Improvements | Limitations |
| | | Delete downloaded files option on Downloads page is disabled if there are no downloaded files in the iPad | |
| | | Subset window displays Full Charts by default when full charts is saved | |

Sincerely,

INDS Team
