

The logo for INDS (Integrated Navigation Data Service) is centered on the page. It features the letters 'IN' in a bold, blue, sans-serif font, followed by 'DS' in a bold, red, sans-serif font. The 'D' and 'S' are connected. The background is a light gray world map with several thin, curved lines representing flight paths or data routes overlaid on it.

Integrated Navigation Data Service for Honeywell Avionics Systems

Honeywell and Jeppesen, the worldwide leaders in cockpit systems and navigation information, offer the best of both avionics and data with the Integrated Navigation Data Service (INDS). INDS offers a broad range of navigation information and coverage options to support worldwide flight operations along with electronic charts shown on large liquid-crystal displays. Data for moving maps and enroute navigation is intuitive and graphical with terrain, obstacle, and navigation information all at your fingertips from departure to destination.

With INDS You Get One-Stop-Shop Convenience for All Your Data and Charts

- **Multifunction Display (MFD) Charts** — Issued every 14 days and contain electronic terminal charts for your INDS subscription. Worldwide coverage of geopolitical boundaries, airport information, and obstacles is also included.
- **Navigation Data for Epic, Primus Elite/PEAF, CDS/R, APEX and AeroVue systems** — Issued every 28 days and contain worldwide airspace, communications, and navigation data, along with city, roads, and highway data.
- **Terrain Databases** — Threat databases (EGPWF & EGPWM) are released every 56 days and contain worldwide airport/runway, obstacle, and terrain data for threat alerting. Terrain Server is released twice per year and contains worldwide terrain data.
- **Aerodrome Mapping Database (AMDB)** — Issued every 28 days and contains over 1000 airports including all aerodrome features such as runways, taxiways, parking stands, and signage
- **Electronic Flight Bag (EFB) Supplemental Charts** — Contains geo-referenced terminal charts (approach, arrival, departure, airport, and Class B airspace). Coverage will match your MFD chart subscription.
- **Required Navigation Performance — Authorization Required (RNP-AR)**
– Operators qualified to fly RNP-AR procedures may subscribe to an RNP-AR navigation database.
- **Trip Kits** — Available for 28 day usage, trip kits provide charts for flights outside current chart coverage area.
