GoDirect™ is Honeywell’s portfolio of industry-leading applications and services that make life easier for operators, pilots and maintenance teams. GoDirect Aircraft Datalink is an accurate and reliable global solution for two-way communications between the aircraft cockpit and ground-based communications networks. Direct two-way access is available to every VHF and satellite network with GoDirect Aircraft Datalink services.

RELIABLE CONNECTIONS EVERYWHERE YOU FLY
Direct two-way access to every VHF and satellite communications datalink network with GoDirect Aircraft Datalink services. Using robust Aircraft Communications Addressing and Reporting Systems (ACARS) protocols, our solution is compatible with major VHF and satellite communications networks.

- ARINC
- ITA
- AVICOM (Japan)
- Aeronautical Radio of Thailand
- Brazilian Department of Airspace Control (DECEA)
- Classic INMARSAT
- Next-generation INMARSAT
- Iridium

GoDirect Aircraft Datalink automatically works with both ARINC and SITA networks – unlike other datalink services that rely on a single network. We also detect the best available network for transmitting and receiving messages – whether it’s VHF digital, VHF analog or satellite communications.

FLIGHT DATA SPECIALISTS ARE ALWAYS THERE FOR YOU
Our Flight Data Specialists are available to help you around the clock. Whether you need to request information, forward a message or troubleshoot – we’re there for you, by phone, email, text or ACARS message.

BENEFITS
- Leverages GoDirect Flight Service’s 30 years of experience
- Provides 24/7 datalink access to qualified dispatch staff, from anywhere in the world
- Reduces workload for pilots and dispatchers by enabling seamless cockpit communications
- Prioritizing the highest communication network for the best experience possible
- Supports all types of aircraft data-communications hardware

NEW DATALINK OPTION OFFERS BIG BENEFITS IN AFFORDABLE PACKAGE
Now GoDirect offers a new, low-cost regional datalink plan, called datalink lite. This new service package is designed for business and general aviation operators, and provides real-time weather information in the cockpit. It also reduces pre-flight pilot workload by uploading flight plans directly into the aircraft’s flight management system.
DATALINK SERVICES:
• FANS Automatic Dependent Surveillance (ADS-C)
• Datalink graphical weather
• XM graphical weather
• Terminal weather
• Flight plan uplinks
• Winds and temperatures aloft Digital D-ATIS
  Pre-departure and datalink ATC oceanic clearances
• Air-to-ground and air-to-air messages
• Email, voice and fax messages
• Human assisted message delivery
• Controller-pilot datalink communications
• Safety management system integration
• Email alias codes

GoDirect offers multiple plans and flexibility to meet your needs, regardless of the size of your flight department and aircraft fleet. With GoDirect Aircraft Datalink from Honeywell, you will have more than a half-century of proven experience and support at your fingertips.

COMPATIBLE WITH THIRD PARTY FLIGHT PLANS
GoDirect Datalink is also compatible with third party flight plans. Here is a list of vendors we are integrated with.

• Skyplan
• Air Support
• RocketRoute
• FlightPlan.com

• ForeFlight
• Jeppesen
• Navtech
• GDFS
• Universal
• UAS

GoDirect Datalink is part of Honeywell’s GoDirect family — the industry’s most complete portfolio of more than 50 aviation services and applications that provide operators, flight crews and maintenance teams with critical information to manage their services and network safely and efficiently.
